

# Lawrence Scouting Report

Games Scouted: Apr. 8 vs. Cornell, Apr. 12 vs. Ripon, Apr. 22 and 23 vs. Monmouth, and Apr. 25 vs. Beloit

## Velocity estimate calculation information:

- Velocity = Distance / Time
- Time = Frames (found using Tracker Video Analysis software) / Frame Rate (fps)
- Distance = 60 ft. 6 in.
- Conversion rate (ft per second to mph) = 0.6818
- Frame rate of video is 60 frames per second
- "Frames" used in the "Time" calculation is the average for 5 different pitches of the amount of frames it took for the pitch to reach home plate from the hand

## Pitcher Velocity Estimates:

Pitcher Name - # ▲	L/R	ID Offspeed	FB Velo	Offspeed Velo	# Pickoff Att.
Elden Santana - #6	RHP	CH,CB	89.6	84.3,82.8	2 att.
Jordan Schaefer - #40	RHP	CH,SL	87.6	82.5,85.5	7 att.
Mike Duttlinger - #2	RHP	CH,Slurve	88.7	84.9,83.9	1 att.
Nick Katz - #37	LHP	CH,SL	84.7	78.1,79.3	3 att.
Preston Andereson - #30	RHP	CH,Slurve	87.1	83.3,81.5	4 att.
Quinn Berglin - #9	RHP	CH,SL	86.2	82.5,82.1	0 att.

## Pitcher Usage Rates:

Typo: Elden Santana - Pitches thrown is 90\*\*

Pitcher Name - # ▲	L/R	Pitches Thrown	Fastball Usage	Offspeed Usage	Batters Faced	FP Strike %	FP Fastball Usage	FP Offspeed Usage
Elden Santana - #6	RHP	62.22%	62.22%	37.78%	19	52.63%	68.42%	31.58%
Jordan Schaefer - #40	RHP	88	55.68%	44.32%	14	71.43%	57.14%	42.86%
Mike Duttlinger - #2	RHP	88	51.14%	48.86%	19	47.37%	63.16%	36.84%
Nick Katz - #37	LHP	83	55.42%	44.58%	19	78.45%	44.67%	55.33%
Preston Anderson - #30	RHP	104	44.23%	55.77%	26	69.23%	34.62%	65.38%
Quinn Berglin - #9	RHP	95	51.58%	48.42%	22	63.64%	63.64%	36.36%

## Pitcher Notes:

### Elden Santana - #6 (RHP):

- Guy throws pretty hard, he's a very brute-force, strikeout pitcher
- Struggled with command at beginning of outings, resorted to throwing the ball down the middle to compensate and paid the price for it
- Missed outside and high to lefties with his fastball extremely frequently
- His changeup does not move very much but it is a solid velocity switch-up
- Mostly depends on the fastball for the 1st pitch but that means when he decides to go changeup 1st pitch it's nasty and hitters were getting folded by it
- His curveball is pretty quick and has a sharp, vertical break profile
- He mostly uses the curveball with 2 strikes as a swing-and-miss pitch
- When he keeps the bender down in the zone it is really, really nasty, but he hangs it at times and pays for it

### Jordan Schaefer - #40 (RHP):

- Unorthodox windup and motion/pre-set stance
- Likes to get ahead in counts with the fastball
- When he throws the fastball 1st pitch it's usually for a strike, but when he throws the offspeed 1st pitch it usually misses
- Pretty efficient strike thrower but he's a pitch to contact type of guy
- Has a hard and sharp slider that he alternates with his fastball

- His changeup is also pretty good and drops a lot with armside run
- Also has a sneaky good pickoff move

#### Mike Duttlinger - #2 (RHP):

- In my opinion doesn't do anything great but also does not do anything bad
- Leaves pitches out over the plate and high frequently, lots of hitters were getting out on high and deep lineouts/flyouts
- His changeup is nasty and drops a ton but honestly he does not sequence it well and it was getting pieced up at times
- Likes to go fastball, slurve, change sequence to hitters out of the gate
- His slurve has a short, horizontal break profile
- The slurve is the pitch to hit in my opinion, it can be capitalized upon if he misses and it really isn't wipeout at all, but it is decent when he keeps it low

#### Nick Katz - #37 (LHP):

- The angle at which his outings were recorded was a little hard for me to analyze and get good insight on, so take this one with a grain of salt
- Lefty  $\frac{3}{4}$  motion
- He throws extremely slow and I don't think velocity differential in his pitches is a factor at all really
- He dots his pitches on the corners well from what it seems and his effectiveness hinges off his sequencing and zone accuracy
- His changeup should be very hittable, it did not drop very much from what I could see but he does well to break it out of the zone away from right handed bats
- Slider was loopy and slow, but breaks a decent bit, could not really see the break profile though

#### Preston Anderson - #30 (RHP):

- Fastball has lots of armside run and noticeable movement
- He utilizes that well to jam right handed hitters with inside heaters
- Throws a lot of strikes, very efficient
- His changeup doesn't move much but he spots it very well
- Changeup low and away to lefties is also a highly used/effective pitch from him
- 1st pitch is either a fastball or slurve and he misses quite frequently with the 1st pitch fastball, but his 1st pitch slurve is a nice get me over
- Slurve has really good depth and also horizontal movement
- However, it sometimes falters and does not attain that desired horizontal break and it can definitely be a pitch to capitalize on in those situations

### Quinn Berglin - #9 (RHP):

- Has a quick sidearm delivery and also works extremely fast on the mound
- Dots the corners with his fastball very effectively
- He sequences his changeup very well and uses it at opportune moments to get hitters out in front whiffing
- Fastball and changeup have very similar movement profiles, tunnels well
- Another guy that doesn't have the velocity to overpower hitters so when he leaves pitches up the in the zone he pays for it
- His slider has a sweeping movement profile and is very effective when he keeps it low and it runs away from right handed bats nicely
- He is a ground ball pitcher and something to take note of is the fact that he dirt's a lot of pitches trying to keep everything low in the zone
- I think this can be exploited on the basepaths a decent bit

## Lineup Statistics:

Player Name - #	▲ B/T	Position	# of ABs	Pitches Seen	FP Swing %	Chase %	Looking Strike %	Sac Bunts	Home to First
Edan Perez - #11	R/R	SS	9	28	33.33%	7.14%	10.7%	0 att.	4.23s
Jacob Charon - #23	R/R	OF	10	33	40%	9.09%	12.12%	0 att.	4.42s
Jake Land - #24	R/R	IF	5	21	20%	38.09%	33.33%	0 att.	4.41s
Luke Miles - #27	R/R	OF	7	18	42.86%	33.33%	5.56%	1 att.	4.33s
Mitchell Sandleback - #14	R/R	C	5	16	60%	25%	6.25%	7 att.	4.48s
Parker Knoll - #17	R/R	OF	10	31	66.67%	12.90%	6.45%	0 att.	4.07s
Taylor Freeman - #13	R/R	2B	10	32	60%	3.13%	12.50%	0 att.	4.28s
William Polanco - #29	R/R	3B	7	29	57.14%	20.69%	13.79%	0 att.	4.35s
Zach Leslie - #28	R/R	1B	6	18	33.33%	0%	11.11%	0 att.	4.40s

## Lineup Notes:

### Edan Perez - #11 (SS):

- 3 hole hitter, definitely a guy to be cautious of
- He has a patient approach, waiting for his pitch but he is very ready to hit and can go from 2 to 3 takes in a row to jumping on the first good pitch to hit
- Dangerous when he is ahead in the count and can hit offspeed very well
- Has power to all fields and is a threat to run on the bases as well

### Jacob Charon - #23 (OF):

- This guy is definitely also a heavy lifter in this lineup and has a lot of power
- He has loud outs and home run power to all fields as well
- Does not hit for contact though and takes massive hacks
- Good plate discipline as well

### Jake Land - #24 (IF):

- This guy is not very good and not much of threat at all from what I saw
- His swing cuts himself off and he can be exposed with outside pitches
- He will also just swing away and chase random pitches as well (chase %)

### Luke Miles - #27 (OF):

- Not great at the plate either really
- Chases a lot (chase %) with a pretty bad swing and does not seem to have much power, late on a lot of pitches

### Mitchell Sandleback - #14 (C):

- Not a great hitter, has a pretty bad swing and also chasing pitches without 2 strikes and at random times (chase %)
- However, he showed bunt 60% of the time on the first pitch of his at bats
- He got a bunch of really good bunts down that got the sacrifice job done and even got him on base a few times
- Pop time: 2.23s

### Parker Knoll - #17 (OF):

- Really good, dangerous leadoff hitter
- Will take the first pitch at times, but is very very ready to swing away after that
- Decent plate discipline as well like the rest of the good hitters on the squad
- Doesn't exactly seem to have out of the park power
- However, he pulls the shit out of the ball and almost every hit I saw was over the third baseman's head, down the line, or in the 5-6 hole
- Extremely fast and aggressive, will steal and try to take the extra bag always

Taylor Freeman - #13 (2B):

- Dude is also a beast, has a great eye and good plate discipline
- Pulled the ball in the left center gap frequently, but has power to all fields
- I saw a lot of loud outs and few home runs on film as well
- Not a great defensive player though I will say

William Polanco - #29 (3B):

- I could not really make my mind up about this guy to be honest
- He looks imposing w/ a decent swing but he missed a lot of cookies at the plate
- Grounds out quite a lot, gets jammed, cuts himself off
- But he honestly could run into one for a key hit as he did a few times on film
- Decent runner as well

Zach Leslie - #28 (1B):

- Another key hitter in the lineup, but I thought he was underwhelming
- His swing is not great and he cuts himself off big time
- Inside fastballs are for sure his wheelhouse and he has pull side power on those
- However, he got cut up on outside breaking stuff with what I watched
